NUANCIST NEW

Nuancist is a new and uniquely sanded clinker brick slip that works in both detailed and large surface designs. The different surfaces subtly blend into each other in terms of character and intensity, creating a lively but cohesive play of colours. Natural ageing effects and traces of use that show on the surface and on the edge give Nuancist its special charm.

Nuancist is not sawn from whole bricks, but is extruded as a thin clinker brick slip and manufactured energy-efficiently at 1.200 degrees in sinter firing. This saves raw materials, energy and waste and makes these clinker brick slips a particularly sustainable building material.
